IG: aaron._.mah

An Industrial/Product designer whose design philosophy is to design and make products that do not require any form of adhesives in the process of assembly. Loves working with materials such as paper and cardboard. Proficient in conceptualising, creating visuals, 3D modelling, and producing renderings that communicate the design.

As the field of design is ever evolving, there is always a willingness to understand and learn more hard and soft skills to keep up with the trends.

Experience

Internship @ Paper Carpenter **Singapore - 2017**

Learnt a new 3D software dedicated to the folding of cardboards of different thickness.

Learnt how to calculate different tolerances for cardboards of different thickness for folding.
